

Planting at the Black Bitch Sculpture

These are the intended plants for the bed to the west of the Black Bitch sculpture. Some may not be available so alternatives may have to be used.

They were selected as we wanted perennials and shrubs rather than bedding plants. In addition, it is a windy corner and the soil is dry due to the nearby trees absorbing a lot of rainfall so consideration had to be given to these factors too.

				
Stachys byzantina (lamb's ears)	Aquilegia longissima 'Yellow Bonnet'	Geranium Johnson's Blue	Geranium Macrorrhizum (pink)	Tanacetum coccineum (pyrethrum) 'Robinson's Red'
